SYSTEMS ENGINEERING FOR DIGITAL INNOVATIONS

New Course Offering: SM Information Systems IV, Winter Semester 2019/20
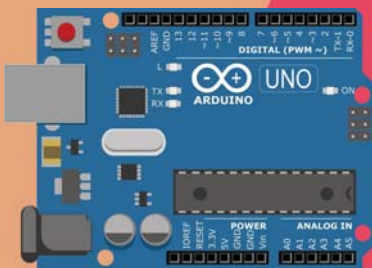

Learn how to develop innovative sustainability software solutions running on advanced digital technologies

1. Address a Sustainability Innovation Challenge

2. Develop a Software Solution Running on Digital Technologies

- Form your team of students.
- Identify a concrete problem from the global sustainability challenges.
- Choose a digital technology platform and start developing a solution!
- Freely decide on your project and budget.

- Learn and apply agile and design-led techniques.
- Plan, design, prototype, and implement your solution.
- Be creative and think out of the box!

CHAIR FOR INFORMATION SYSTEMS AND SYSTEMS DEVELOPMENT

Prof. Dr. Jan Recker and Dr. Janek Richter
